PROFESSIONAL SUMMARY

Graduated in 2026 in Computer Science, specializing in full-stack development and applied AI, with hands-on experience frontend and full-stack development, cloud integration (AWS), and machine learning projects. Adept at building user-focused, scalable web applications. Strong communicator and fast learner with exposure to agile workflows and real-world financial tech solutions.

INTERNSHIP EXPERIENCE

FrontendDeveloper (Angular) **May 2025 – July 2025**
Applied Cloud Computing Ltd. (Client: Tata Mutual Fund) *On-site (Mumbai)*

- Refactored and expanded a legacy modal into a responsive, full-page banking data display, enhancing user readability and interaction with complex financial data.
- Engineered a reusable Angular component for dynamic nominee entry, integrating with backend REST APIs and ensuring data validation to improve user data entry efficiency
- Collaborated in agile sprints with backend/QA teams, gaining exposure to financial tech workflows and contributing data analysis for a research publication

PROJECTS

Full-Stack Doctor Appointment System(MERN)
Developed a comprehensive, full-stack (MERN) application to streamline medical appointment scheduling, management, and payments. Implemented a secure, role-based authentication system (User, Doctor, Admin) using JWT and Bcrypt. Built the Node.js/Express backend with MongoDB (Mongoose) to manage all API routes and integrated Cloudinary for cloud media management.
https://github.com/AtharvaSonnis2705/SAANS---medical-booking-app/tree/main

InvoiceGenerator with AWS Integration
Tech Stack: Node.js, React, AWS Lambda, S3, SES, API Gateway, PDFKit, QRCode, Vite, Tailwind
Built a full-stack invoice generation system allowing users to create, store, and email PDF invoices. Used AWS Lambda for serverless operations and SES for secure email handling. Embedded QR codes and ensured efficient PDF rendering and delivery

Mental Health AI Chatbot
Developed an AI-driven Mental Health Chatbot using Keras and TensorFlow to provide automated emotional support. Engineered a custom NLP pipeline featuring NLTK tokenization and lemmatization, coupled with a Deep Neural Network to accurately classify user distress signals into therapeutic response categories.
https://github.com/AtharvaSonnis2705/Mental-Health-Chatbot-

Influence AI – Auraflix Tech-AI Hackathon
Tech Stack: React, Node.js, YouTube API
Developed an analytics dashboard processing 1000s of comments to rate toxicity,sponsorships, views, and more. Built analytics dashboard using React and backend with Node.js.

EDUCATION

Vidyalankar Institute of Technology, Mumbai University **2022 – 2026**
BE in Computer Engineering (Current CGPA: 8.58)

Model College, Dombivli **2020 – 2022**
HSC - XII (PCM + CS) (71.33%)

Holy Angel's School & Jr College, Dombivli **2019 – 2020**
CBSE X (89.20%)

SKILLS

Languages/Frameworks: Python, JavaScript, TypeScript, Node.js, React, Next.js

AI/ML: TensorFlow, Keras, NLTK, scikit-learn, Hugging Face Transformers, NLP, Deep Learning

Generative AI: LLM APIs (Claude, OpenAI GPT, Gemini), Prompt Engineering, RAG, LangChain, LangGraph, Vector Databases (FAISS, ChromaDB), AI Agents, Model Context Protocol (MCP)

Development Tools: Git/GitHub, Postman, Docker, Claude Code, GitHub Copilot, Cursor

Cloud & Infra: AWS Lambda, S3, SES, Turborepo/Monorepo
